

## Wood Collection Disclaimer

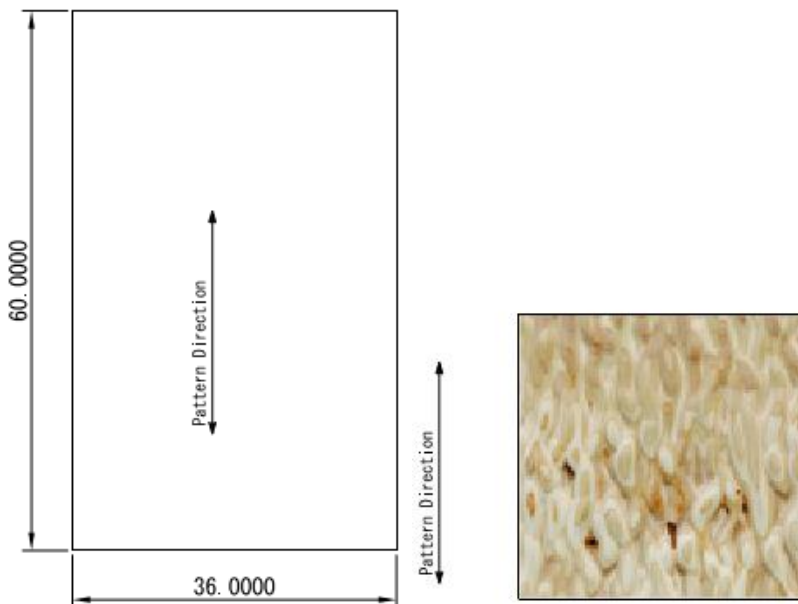

The wood panels are manufactured from Baltic Birch plywood core. We create texture and dimension by exposing the multiple layers beneath the surface of the plywood core. Fuller Architectural Panels makes every effort to use the highest quality material available. Because of the natural characteristics of plywood, variations in color, pattern, texture, grain and density should not be considered a defect but rather unique and individual characteristics to your product resulting in a one of a kind panel. **While the patterns are programmed to run continuous from sheet to sheet the shading and color consistency will vary from panel to panel and should be expected.**

Customers' purchase and installation of the wood architectural panels constitute the acknowledgement of the individuality and risks inherent in the use and installation of this natural product.

The wood panels are available unfinished. All finishing should be done in accordance with local building standards and completed by a licensed finishing contractor. FullerAP, Inc. is not responsible for changes or modifications made to the products in the field.

I have read and understand that I should expect variations in color and wood grain from panel to panel and release FullerAP, Inc. from responsibility of replacing panels due to the natural characteristics of wood products.
